Yong-Jun Shin

yjshin@etri.re.kr | https://yongjunshin.github.io/
Daejeon, South Korea

Summary

I'm a senior researcher at ETRI, a national research institute in South Korea. I received my Ph.D. in software engineering at KAIST under the guidance of Professor Doo-Hwan Bae in 2023. My Ph.D. research focused on data-driven environment model generation for efficient verification of cyber-physical system (CPS) software. My research interests include model-based software engineering, SW verification and validation, mobility & robotics SW, and edge computing. You can find my publications and academic activities on my homepage.

Experience

- **Electronics & Telecommunications Research Institute (ETRI)** *03 2025 - Present*
  Senior researcher Daejeon, South Korea
- **Electronics & Telecommunications Research Institute (ETRI)** *01 2023 - 02 2025*
  Researcher Daejeon, South Korea

Education

- **Korea Advanced Institute of Science and Technology (KAIST)** *03 2017 - 02 2023*
  Ph.D in software engineering Daejeon, South Korea
  - Thesis: Virtual Environment Model Generation for CPS Goal Verification using Imitation Learning
  - Advisor: Prof. Doo-Hwan Bae
- **Handong Global University** *03 2013 - 02 2017*
  BS in computer science Pohang, South Korea

Publications

C=International Conference, J=International Journal, T=Thesis

[C.13] Shin, Yong-Jun and Utz, Wilfrid (2025). **A Platform-Independent Software-Intensive Workflow Modeling Language And An Open-Source Visual Programming Tool: A Bottom-Up Approach Using Ontology Integration Of Industrial Workflow Engines**. In *The 40th ACM/SIGAPP Symposium On Applied Computing (SAC)*

[J.1] Shin, Yong-Jun and Shin, Donghwan and Bae, Doo-Hwan (2024). **Virtual Environment Model Generation for CPS Goal Verification using Imitation Learning**. In *ACM Trans. Embed. Comput. Syst.*

[T.1] Shin, Yong-Jun (2023). **Data-driven environment model generation using imitation learning for efficient cyber-physical system goal verification**. In *Ph.D. Thesis. Korea Advanced Institutte of Science and Technology (KAIST)*

[C.12] Cho, Esther and Shin, Yong-Jun and Hyun, Sangwon and Kim, Hansu and Bae, Doo-Hwan (2022). **Automatic Generation of Metamorphic Relations for a Cyber-Physical System-of-Systems Using Genetic Algorithm**. In *2022 29th Asia-Pacific Software Engineering Conference (APSEC)*

[C.11] Shin, Yong-Jun and Cho, Esther and Kim, Hansu and Bae, Doo-Hwan (2022). **Hands-on field operational test dataset of a multi-controller cps: A modeled case study on autonomous driving**. In *2022 17th Annual System of Systems Engineering Conference (SOSE)*

[C.10] Shin, Yong-Jun and Bae, Joon-Young and Bae, Doo-Hwan (2021). **Concepts and models of environment of self-adaptive systems: A systematic literature review**. In *2021 28th Asia-Pacific Software Engineering Conference (APSEC)*

[C.9] Baek, Young-Min and Cho, Eunho and Shin, Yong-Jun and Bae, Doo-Hwan (2021). **A Modeling Method for Representation of Geographical Information of a System-of-Systems**. In *2021 16th International Conference of System of Systems Engineering (SoSE)*

[C.8] Shin, Seungchyul and Hyun, Sangwon and Shin, Yong-Jun and Song, Jiyoung and Bae, Doo-Hwan (2021). **Uncertainty based fault type identification for fault knowledge base generation in system of systems**. In *2021 16th International Conference of System of Systems Engineering (SoSE)*

[C.7] Shin, Yong-Jun and Liu, Lingjun and Hyun, Sangwon and Bae, Doo-Hwan (2021). **Platooning legos: An open physical exemplar for engineering self-adaptive cyber-physical systems-of-systems**. In *2021 International Symposium on Software Engineering for Adaptive and Self-Managing Systems (SEAMS)*

[C.6] Shin, Yong-Jun and Cho, Eunho and Bae, Doo-Hwan (2021). **PASTA: An efficient proactive adaptation approach based on statistical model checking for self-adaptive systems**. In *International Conference on Fundamental Approaches to Software Engineering (FASE)*

[C.5] Baek, Young-Min and Mihret, Zelalem and Shin, Yong-Jun and Bae, Doo-Hwan (2020). **A Modeling Method for Model-based Analysis and Design of a System-of-Systems**. In *2020 27th Asia-Pacific Software Engineering Conference (APSEC)*

[C.4] Park, Su-Min and Shin, Yong-Jun and Hyun, Sangwon and Bae, Doo-Hwan (2020). **Simva-sos: Simulation-based verification and analysis for system-of-systems**. In *2020 IEEE 15th International Conference of System of Systems Engineering (SoSE)*

[C.3] Shin, Yong-Jun and Baek, Young-Min and Jee, Eunkyoung and Bae, Doo-Hwan (2019). **Data-driven environment modeling for adaptive system-of-systems**. In *Proceedings of the 34th ACM/SIGAPP Symposium on Applied Computing (SAC)*

[C.2] Shin, Yong-Jun and Hyun, Sangwon and Baek, Young-Min and Bae, Doo-Hwan (2019). **Spectrum-based fault localization on a collaboration graph of a system-of-systems**. In *2019 14th Annual Conference System of Systems Engineering (SoSE)*

[C.1] Baek, Young-Min and Park, Su-Min and Shin, Yong-Jun and Bae, Doo-Hwan (2018). **A meta-model for representing system-of-systems ontologies**. In *Proceedings of the 6th International Workshop on Software Engineering for Systems-of-Systems*

Honors and Awards

- **Best Artifact Paper Award** *2021*
  16th Symposium on Software Engineering for Adaptive and Self-Managing Systems (SEAMS)
- **Best Paper Award** *2019*
  2019 Korea Computer Congress (KCC)
- **Outstanding Paper Award** *2018*
  2018 Korea Software Congress (KSC)
- **Best Paper Award** *2018*
  20th Korea Conference on Software Engineering (KCSE)

Academic Services

- **Program Committee** *2024 - 2025*
  International Workshop on Software Engineering for Systems-of-Systems and Software Ecosystems (SESoS)
- **Program Committee** *2024 - 2025*
  International Conference on Software Engineering & Knowledge Engineering (SEKE)
- **Reviewer** *2023*
  Journal of Software: Evolution and Process - special issue on 'Software Engineering for Systems-of-Systems and Software Ecosystems'
- **Live! Team Korea** *2020*
  The 42th International Conference on Software Engineering (ICSE)'
